

Appl. No. : 10/764,012
Filed : January 23, 2004

SUMMARY OF INTERVIEW

Attendees, Date and Type of Interview

The interview was conducted on July 31, 2007 and attended by Examiner Alicia Chevalier, Inventor Wade Brown, Representative Stephen R. Jenkins, and Representative William B. Bunker.

Exhibits and/or Demonstrations

Photos and samples of various composite products made of the claimed formulation were shown to the Examiner.

Identification of Claims Discussed

All of the pending claims were discussed

Identification of Prior Art Discussed

U.S. Patent No. 3,830,776 (Carlson et al.) and U.S. Patent No. 4,439,548 (Weisman)

Proposed Amendments

Applicant presented claim amendments that appeared to overcome the prior art of record.

Principal Arguments and Other Matters

Combination of Carlson et al. and Weisman teach away from each other and the claimed composite material. Weisman fails to teach a second polyether or polyester, and rather teaches a diol that is not a polyether or polyester type polyol. Weisman also discloses polyurethane materials in combination with thermoplastic additives, which are not necessary in the claimed composite formulations.

Results of Interview

Applicant would file a Request for Continued Examination with the proposed amendments to overcome the rejections of record.
